ATTORNEY GENERAL'S SECOND SET OF
DOCUMENT AND INFORMATION REQUESTS

D.T.E. 05-8

Respondent: Theodore Poe, Jr.

Information Request AG-2-2

Q. Please identify the percentage of actual LNG that was sent out in the winter of 2003-04.

A. In the same format as the Company's response to AG 2-1, the Company has calculated the amount of LNG actually sent out during the winter of 2003/04 (November 2003 through March 2004). LNG dispatched to satisfy the Company's firm sendout requirements can be found in the rows labeled 'DOMAC Vapor' and 'LNG From Storage.' The Company's firm sendout requirements can be found in the row labeled 'Firm Sendout.' The table below reproduces these numbers and calculates the percentage requested. All volumes are in BBtu.

	<u>2003/04</u>
DOMAC Vapor	1,418
<u>LNG From Storage</u>	<u>4,284</u>
Total LNG	5,702
 Firm Sendout	 83,538
 Total LNG as a Percentage of Firm Sendout	 6.8 %

The winter of 2003/04 was 4.1 percent colder than normal as measured in effective degree days at Logan International Airport.
